Our Story

Welcome to Save The Kids!

We are a token created in collaboration between influencers and crypto developers with the intention of having a positive impact on the world.

TOKENOMICS

The **Save The Kids** token is designed to create a stable token that appeals to both traders and holders while raising money for children across the world.

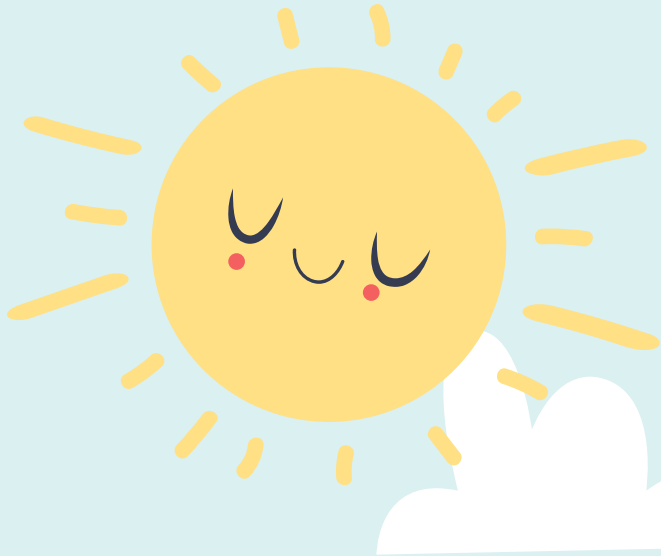
$KIDS will launch with a **1,000,000,000 initial token supply**. Every transaction will have a **3% total fee**, split evenly across Liquidity pool, redistribution, and charity.

Why? We have chosen a lower fee than other coins to incentivize trading and repeated investments. A high fee discourages buying and selling, which in the long run will reduce the amount given to charity. Our goal is to create a token that attracts all sorts of traders, investors, and charitable people while raising money for children across the world.

TOKEN DETAILS

Shorthand:
$KIDS

A.

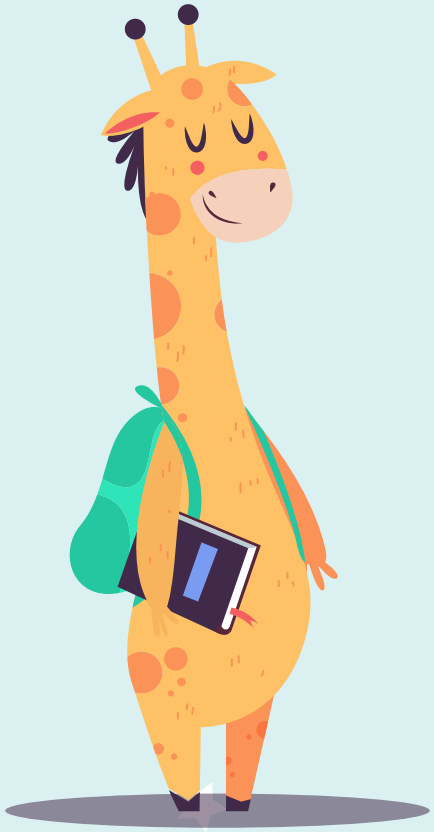


B. **1,000,000,000** token supply

Smart chain:
BEP-20

C.

D. **3% transfer fee**, split evenly across liquidity pool, holders, and charities



WHAT SETS US APART: AMBASSADORS

We know how difficult finding legit token projects can be. It is difficult to know when something is a rug-pull and when the token developers truly want to do good. That's why we've partnered with several ambassadors to give investors the social proof and **confidence** that we are in it for the long haul. Our ambassadors have a combined total of over **20M followers and subscribers** across various social media and are all heavily invested in the altcoin space. They are in this with us and believe in our mission as much as we do. We will continue to partner with new ambassadors regularly to continue to **grow $KIDS token** and **help children across the world**.

Charitable Donations

We have partnered with Binance Charity and will donate directly to their projects aimed at helping children. To start, we will be donating to ***Binance Lunch for Children***, which will provide lunches to less fortunate school children in Africa. Once the Binance project is complete, Save The Kids token will update the charity we fund to the next child-focused Binance project with input from the $KIDS token community and investors.
